WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

About 900 mm long, ends cut at the brace angle so it stays inside the frame

Runs from 180 mm up at the front leg to 820 mm up at the back leg, on the outside

One 5 mm screw into each leg; stops the frame racking front to back

Check: the frame does not lean when pushed at the top shelf
